

# Window fittings

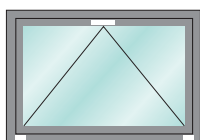

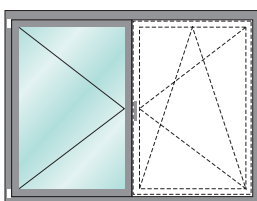

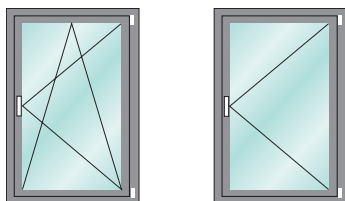

for the steel systems  
Janisol HI, Janisol and Jansen-Economy 50

# Jansen window fittings.

## The packaging concept to make placing an order easy and efficient.

### Two types of fitting are available:

- Standard window fitting  
Surface-mounted fitting for operation with one hand, for side-hung, turn/tilt, double-vent and bottom-hung windows
- Concealed window fitting  
Fitting for operation with one hand, for side-hung, turn/tilt and double-vent windows

### Advantages

- Big time saving in assembly because it is no longer necessary to pick and put together the individual parts for each window.
- Each set is clearly arranged and contains a listing of the parts and how they are fitted to the casement or frame. The drilling gauges are also shown to facilitate drilling the holes correctly.

### • Window sizes:

*Jansen-Economy 50 and Janisol*  
Side-hung and turn/tilt window:  
FFH 575-2300 mm  
FFB 370-1475 mm

Bottom-hung window:  
FFH 370-2300 mm  
FFB 575-2300 mm

*Janisol HI*  
Side-hung and turn/tilt window:  
FFH 600-2800 mm  
FFB 600-1475 mm

Bottom-hung window:  
FFH 600-2800 mm  
FFB 600-2800 mm

- The three steel systems are fully integrated in the Janisoft design software.
- All article numbers for ordering start with 560.xxx
